

DISPOSAL OF FLUORESCENT BULBS FOR COMMERCIAL BUSINESSES

All fluorescent bulbs (fluorescent lamps- straight, shattershields, U-tubes and circular), mercury vapor lamps, metal halide lamps and high pressure sodium lamps contain mercury and are to be disposed of properly and not thrown in the garbage. Below is information from AERC Recycling Solutions, a private company, who will take your bulbs for disposal. **Please note, this is not through the Borough's Recycling Program.**

RecycleKits

It's easy to begin.

Getting started with AERC RecycleKits is simple. Just visit RecycleKits.com and follow the instructions there. You can also e-mail us at info@recyclekit.com, or phone AERC at 866-447-5177.

Use your credit card to pay for your RecycleKits, which will be delivered via FedEx Ground. As you fill each one, seal it and apply the labels that come with it. Hand it to your FedEx Ground driver next time he or she stops by. *Simple as that.*

CONTAINER CHOICES

RecycleKits' safety containers meet your specific needs for:

- A. Fluorescent, mercury vapor, metal halide, ultra-violet double, and high-pressure sodium lamps: 4', 6' or 8' reinforced boxes with 4-mil protective liner.
- B. Batteries and Non-PCB ballasts:
One-gal. (12-lb.) or five-gal. (60-lb.) heavy-duty DOT-approved pail.
- C. Mercury: One-gal. Mercury Spill Kit for clean up of mercury. One-gal. and five-gal. heavy-duty DOT-approved pails for mercury containing devices.
- D. Electronic equipment: 24" x 24" reinforced box holds up to 60-lb. of electronics. One-gal. DOT-approved pail, holds approx. 50 cell phones.
